EXPERIENCE

IT Intern | Internship

Indian Railway Catering and Tourism Corporation Ltd. (IRCTC)

May 2025 - Jun 2025

On-site • New Delhi, India

- Enhanced alert triage and enrichment using a 2,000+ IOC and threat-keyword repository, facilitating quicker identification of high-risk events and reducing initial investigation time by ~30%.
- Evaluated alert severity and escalated confirmed high-impact incidents to specialized teams, minimizing response delays and alleviating unnecessary SOC workload.
- Conducted investigations of IPS and network security logs in collaboration with NOC and Payment Gateway teams to validate suspicious activity, differentiate false positives, and improve visibility into policy violations.

Technologies / Skills Used : SIEM (Splunk), Network & Event Log Analysis, VirusTotal, Excel, MITRE ATT&CK

PROJECTS

Windows Log Analysis & Detection Engineering Lab | 🐙 Github

Jan 2026 - Feb 2026

- Performed alert triage by correlating Windows EVTX logs to distinguish benign activity from suspicious behaviour, developing 10+ Splunk & Sigma detections mapped to MITRE ATT&CK and reducing false positives by 40%.
- Prioritized and escalated high-risk alerts by analyzing PowerShell misuse, brute-force attempts, and anomalous process execution, improving investigation turnaround time by 25%.

Technologies / Tools Used : Splunk, Windows Event Logs (EVTX), Sigma, MITRE ATT&CK, PowerShell

Network Intrusion Detection & Traffic Analysis (Suricata IDS) | 🐙 Github

Oct 2025 - Nov 2025

- Monitored and investigated IDS alerts from simulated attacks, analyzing traffic patterns to validate true threats and rule out benign network activity.
- Reviewed 25+ security events to assess alert severity and detection logic, gaining hands-on experience with SOC-based alert validation and escalation decisions.

Technologies / Tools Used : Suricata IDS, Network Traffic Analysis, PCAP Analysis, IDS Alerts

Endpoint File Integrity & Monitoring Utility (Local-FIM) | 🐙 Github

Jul 2025 - Aug 2025

- Designed a Python-based File Integrity Monitoring (FIM) solution to detect unauthorized file and directory changes by establishing cryptographic baselines.
- Evaluated file change alerts to differentiate legitimate system activity from suspicious modifications, reducing unnoticed tampering risk by 20% in a simulated local environment.

Technologies / Tools Used : Python, File Integrity Monitoring, Hashing, File Change Detection

SKILLS

Technical Skills :

Alert Triage, Severity Assessment & Escalating Decisions, False Positive & True Positive Analysis, 24X7 Alert Monitoring, Incident Response & Documentation, Threat Analysis, Log Analysis, Network Traffic Analysis (TCP/IP/DNS/SMB/OSI), Incident Playbooks, PowerShell, SLA Awareness, AWS, EDR (Microsoft Defender)

Tools & Languages :

SIEM (Splunk/Wazuh), MS Excel, Power BI, Python, Bash Scripting, SQL, Nmap, Wireshark

Frameworks Libraries :

MITRE ATT&CK, NIST Incident Response Lifecycle, OWASP Top 10, OSINT

Soft Skills :

Adaptability, Decision Making, Problem Solving, Teamwork

Languages :

English, Hindi, Bengali, Japanese

EDUCATION

Vellore Institute of Technology, Bhopal | Bhopal

B.Tech CSE (Specialization in Cyber Security & Digital Forensics)

Sep 2022 - Apr 2026

CGPA/% : 8.70

Courseworks: IT Networking, Operating Systems, Digital Forensics, Privacy & Security Regulations

Vivekanands Kendra Vidyalaya, Tinsukia | Tinsukia, Assam

Class X & XII

Mar 2008 - Jul 2022

Percentage : 86.6 & 77.2

CERTIFICATIONS

- Certified Fundamentals in Cybersecurity (NSE1 & NSE2), Fortinet
- Certified AppSec Practitioner (CAP), The SecOps Group
- SC-900: Security, Compliance & Identity Fundamentals, Microsoft
- CompTIA Security+ - SY0-701 (On Progress)

AWARDS & ACHIEVEMENTS

- Campus Ambassador, Entrepreneurship Development Cell (eDC), IIT Delhi-Led campus outreach initiatives, increasing student participation in entrepreneurship programs by 100+ students.
- Completed 90+ cybersecurity labs on TryHackMe, maintaining a profile in the top 7% globally.
- Solved 25+ blue-team challenges involving phishing detection, lateral movement, and log correlation.
- Secured 3rd position in CTF Competition among 50+ teams at VITB Annual Tech-Fest 2025.
- Independently tracking and analyzing disclosed CVEs across web, network, and OS layers-documenting root causes, CVSS scores, and patch timelines to build threat-pattern intuition.
